WITH OVER 10 YEARS OF EXPERIENCE

Ultra Hair Clinic is here to make your hair journey simple, comfortable, and brings everything you need for a smooth and supportive experience under one roof.

At Ultra Hair Clinic, we don't believe in one-size-fits-all solutions. We believe in precision, care, and results that restore more than just hair, they restore confidence.

WHY CHOOSE ULTRA HAIR CLINIC?

- UK-based medical standards and safety protocols.
- Experienced hair restoration specialists.
- Personalised treatment plans.
- Natural, aesthetic-focused results.
- Ongoing post-treatment support.

EXPERTISE YOU CAN TRUST

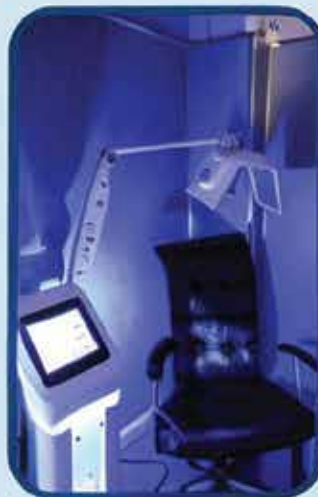

Ultra Hair Clinic Our staff takes the time to understand your concerns, answer your questions, and build a treatment plan tailored specifically to your needs. You are supported not only by medical professionals, but by a team committed to restoring confidence with integrity and care.

Because true excellence
is not just about
advanced technology
it's about the people behind it.

PERSONALISED CARE, PROFESSIONAL EXCELLENCE

From your first consultation to your final follow-up, our team works collaboratively to ensure every stage of your journey is guided, monitored, and supported.

WHERE EXPERTISE, INNOVATION & CARE **COME TOGETHER**

Your hair restoration journey deserves the right environment, the right expertise, and the right support.

At **Ultra Hair Clinic**, you'll find all three, under one roof.

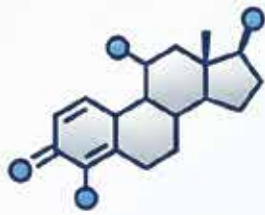

Not all hair-loss journeys are the same.

Genetics, hormones, lifestyle, and age all play a role.

Genetics

Hormones

Lifestyle

Age

That's why every treatment at Ultra Hair Clinic begins with a deep analysis and a plan designed specifically for you.

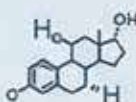

1: Genetic / Hereditary Hair Loss (Androgenetic alopecia)

This is the most common hair-loss cause in men. Hair follicles gradually shrink due to genetic and hormonal influences, leading to thinner hair, receding hairline and thinning at the crown.

2: Hormonal Effects (especially from DHT)

In men, the male hormone testosterone converts into another hormone called dihydrotestosterone (DHT), which can shrink hair follicles over time, damaging their ability to produce normal hair.

3: Stress, Medical Conditions & Lifestyle Factors

Physical or emotional stress, sudden illness, major surgery, or significant weight loss can push hair follicles into a resting phase prematurely, a condition called Telogen effluvium.

1: Genetic / Pattern Hair-Loss (Female Androgenetic Alopecia)

Women too can experience pattern hair loss that runs in families; in women it's often characterized by a general thinning over the scalp rather than receding hairline.

2: Hormonal Changes (Pregnancy, Menopause, Thyroid, etc)

Hormonal fluctuations, due to pregnancy, childbirth, menopause, or thyroid disorders can significantly disrupt the hair growth cycle and trigger shedding or thinning.

3: Nutritional Deficiencies, Stress & Lifestyle / Hair-Care Practices

Intake of nutrients, especially iron, protein, vitamins (like B, D), minerals can weaken hair and cause thinning or shedding. Additionally, damaging hair-care habits like frequent chemical, heat styling, or tight hairstyles.

1. Hair Analysis

A detailed examination of your scalp and hair health to identify concerns and create a personalized treatment plan.

2. Platelet Rich Plasma (PRP)

A natural treatment that uses your own growth factors to strengthen hair roots and support healthier, thicker growth.

3. Hair Transplants

A precise, long-lasting solution that relocates healthy follicles to thinning areas for a natural, permanent look.

4. Laser Hair Regrowth Therapy

A non-invasive treatment that uses targeted low-level laser energy to boost circulation, and support healthier, fuller hair growth.

5. Hair Systems

Custom-designed, natural-looking solutions that blend seamlessly with your existing hair to restore confidence without surgery.

6. Microneedling

Treatment that uses tiny microchannels to stimulate collagen, improve scalp health, and boost the absorption of hair-strengthening serums.

7. Exosomes Therapy

Powerful bioactive exosomes to activate dormant follicles and support stronger, healthier hair growth.

8. Platelet-Rich Fibrin

A next-generation, all-natural therapy that uses your body's own concentrated fibrin and growth factors to promote fuller, long-term hair restoration.

The hair specialist team have made me feel extremely comfortable and have always given me a professional experience. I came to them with not the most confidence in how I felt about myself, & I left feeling extremely confident in how I looked.

My refusion appointments are always something I look forward to for a good catch up with the girls and a laugh. The staff are so kind and caring and always make sure I am very well looked after.

My hair system is one of the best decisions I have ever made, thank you team keep up the hard work.

“For a while I started to notice my hair thinning and falling out. I became very upset and felt myself becoming more & more withdrawn. Then, a friend told me about a solution to my problem, she said her father had a hair system and was thrilled with the results and recommended I consider it. I did and went ahead with it and I can honestly say it changed my life – or rather gave me my old longed for life back!
I really encourage anybody who is considering a hair system to go for it”

Angela

“After many years of battling my hair thinning alone, I decided to contact Ultra Hair Clinic. I went along to my consultation feeling shy and reluctant to disclose my issues. I also requested a female consultant. Within minutes I felt comfortable and at ease with Them. She was very understanding and empathetic towards my situation and I really felt listened to! I opted for the Laser Hair treatment and i can’t believe it changed my life! Now i feel a confident individual and the world is my oyster. Thank you so much team”

Sadia

“Nights out were always the hardest for me. As a transgender woman I saw myself for the woman I truly am, however, I was fully aware that some others did not. I thought I had overcome the hard part, but little did I know that losing my hair would be such a devastating ordeal. I’m now so happy with my hair I feel like a magical unicorn!!! My hair is ME and a true definition of my persona. Thank you Ultra, for listening to me without prejudice or preconceptions, to me that meant the whole world”

Lisa

THANK YOU

for choosing us and trusting us
with your hair regrowth journey

Your confidence matters to us
and we take that responsibility seriously.
We're here to support you at every step,
from consultation to confident results.
